ISHIKA DUBEY

West Haven , CT | (475) 227-9133 | ishikawork2025@gmail.com
LinkedIn: https://linkedin.com/in/ishikadubey-809084207
GitHub: github.com/ishika17dubey/DS.git

PROFESSIONAL SUMMARY

Enthusiastic data science student proficient in programming languages like Python and SQL, seeking to apply theoretical knowledge in real-world projects for meaningful impact on company success.

TECHNICAL SKILLS

- Programming: Python, SQL, JavaScript
- Data: NumPy, Power BI, TensorFlow, Hadoop, AWS Athena
- Tools: Git, Kafka, VS Code
- Concepts: Machine Learning, NLP, Data Visualization, Big Data

EDUCATION

Tagliatela College of Engineering, University of New Haven ▪ West Haven, CT [2024 - expected 2026]

Master of Science in Data Science

Coursework:

▪ Machine Learning ▪ Big Data ▪ Data Visualization ▪ Deep Learning ▪ Natural Language Processing (NLP) ▪ Leadership in Data & AI Products ▪ Data Ethics

Tools:

▪ Python ▪ SQL ▪ TensorFlow ▪ Hadoop ▪ AWS Athena

Guru Gobind Singh Indraprastha University ▪ New Delhi, India [2020 - 2023]

Bachelor's in Computer Applications

- **Coursework:**
  ▪ Intro to computers & IT ▪ Data Mining ▪ Artificial Intelligence ▪ Software Engineering ▪ Database Management System ▪ Object Oriented Programming ▪ Computer Networks etc.
- **Tools:**
  ▪ Python ▪ SQL ▪ JavaScript ▪ VS Studio ▪ Oracle

PROFESSIONAL AND LEADERSHIP EXPERIENCE

Risk Mapping Intern

University of New Haven, CT [Dec 2025 – May 2026(Expected)]

- Assist in developing a dynamic risk mapping system to identify archaeological looting risk using raster and spatial data.
- Build a Python-based pipeline to process and analyze temporal geospatial layers for risk prediction.
- Develop automation workflows to streamline data ingestion, preprocessing, and model updates.
- Collaborate with faculty in weekly/bi-weekly meetings and maintain a detailed research log**.**

Graduate Student Council (GSC) Representative, Marketing Club

University of New Haven | West Haven, CT [April 2025 – Present]

- Serve as the liaison between the Marketing Club and the Graduate Student Council to foster communication and collaboration on student initiatives.
- Coordinate and promote club events, workshops, and networking opportunities to enhance student engagement.
- Support leadership in organizing activities focused on professional development and community building.

Holistic Learning ▪New Delhi , India [April 2021 – July 2023]

Tutor

- Tutored students in Computer Science, focusing on programming fundamentals, data structures, and algorithms.
- Created personalized learning materials and coding exercises to simplify complex technical concepts.
- Helped students strengthen their problem-solving and analytical thinking through practical coding sessions and project guidance.

AI Trainer [August 2023 – July 2024]

- Designed and implemented data-driven strategies to analyse student performance metrics, enabling targeted interventions that improved academic outcomes and overall learning efficiency.
- Conducted professional development workshops for educators on AI integration in classrooms, empowering teachers to adopt technology-enhanced learning and assessment tools effectively.
- Leveraged data analytics to identify learning trends and optimize instructional planning, contributing to improved curriculum delivery and evidence-based decision-making.

Excellence Learning ▪ New Delhi , India

Cyber Safety Program (Workshop) [2022 – 2023]

- Conducted engaging Cyber Security Awareness Workshops for students, focusing on safe digital practices and responsible online behaviour.
- Designed and delivered age-appropriate modules on topics like cyber safety, digital footprint, and data privacy for school-aged learners.
- Empowered students to become digitally responsible citizens through interactive sessions, hands-on simulations, and real-life case studies.

RESEARCH AND PROJECTS

A Comparative Study of Machine Learning Classifiers for Marine Fish Abundance Estimation*:*

- Evaluated Random Forest, XGBoost, Gradient Boosting, and Naïve Bayes on the FISHGLOB dataset (216,000+ hauls, 18 countries).
- Achieved 79% accuracy with ensemble methods; identified challenges in predicting high-abundance classes.

Solving the 8-Puzzle Problem Using Search Algorithms:

- Implemented Uniform Cost Search, A*, Breadth-First Search, and Depth-First Search in Python.
- Analyzed efficiency of heuristics and search techniques for optimal puzzle-solving.

Real-Time Sentiment Analysis on Social Media (Distributed Data Pipeline):

- Built a scalable real-time pipeline using Kafka, AWS S3, Glue, and Athena to simulate Twitter sentiment analysis.
- Automated ETL preprocessing and stored partitioned data in S3 for efficient SQL querying.
- Developed Power BI dashboards to visualize sentiment trends for actionable insights.
- Deployed Kafka & Zookeeper via Docker, demonstrating a fault-tolerant, production-ready architecture.

PROFESSIONAL CERTIFICATIONS

Introduction to IT & Cybersecurity - *Certificate of Continuing Education Completion by Cybrary,* April 2021

Django using python - *Certificate of training at ShapeMySkills Pvt. Ltd.,* July 2022 – August 2022

Data Science Foundations: Data Engineering - *LinkedIn Learning,* January 2025

Python: Working with REST and Web Data- *LinkedIn Learning,* February 2025

Learning SQL Programming - *LinkedIn Learning,* February 2025

Azure Spark Databricks Essential Training - *LinkedIn Learning,* April 2025

Apache Spark Essential Training: Big Data Engineering (2021) - *LinkedIn Learning,* April 2025

Technical Product Management - *LinkedIn Learning,* September 2025

Generative AI for Business Leaders - *LinkedIn Learning,* September 2025
